

Screen Printing T-Shirt

Description:

We have up to 300 plus GSM for shirts. Material: 100% cotton.

- In order to get started, I needed an image for the shirts. I took our makerspace logo and added a nifty maker-themed phrase, "What will you make today?", and our location and web site address. This yielded a nice yet simple shirt design. In order to print adult and youth sizes I decided to create two screens of different sizes. Trying to use one size for both just didn't look right in my samples. The main image is about 12 inches across for the adult sized shirts and about 9 inches across for the youth sized shirts. The design will be printed on the back of the shirts and I will also print a smaller image of the logo only, on the front breast pocket area of the shirt.

Puff Print T-Shirt

Description:

We have up to 300 plus GSM for shirts. Material: 100% cotton.

Puff screen printing can create an eye-catching design to make you stand out from the crowd. The process involves the same setups and processes as standard screen printing but it allows for excellent, special 3D effects to be applied to your design.

You can give your full design a raised effect or limit it to certain elements within the design to give it the desired effect and to bring more attention to a specific point. There are no limits to your creativity and you can create whatever design you would like to achieve.
