

Screen Printing T-Shirt

Description:

We have up to 300 plus GSM for shirts. Material: 100% cotton.

- In order to get started, I needed an image for the shirts. I took our makerspace logo and added a nifty maker-themed phrase, "What will you make today?", and our location and web site address. This yielded a nice yet simple shirt design. In order to print adult and youth sizes I decided to create two screens of different sizes. Trying to use one size for both just didn't look right in my samples. The main image is about 12 inches across for the adult sized shirts and about 9 inches across for the youth sized shirts. The design will be printed on the back of the shirts and I will also print a smaller image of the logo only, on the front breast pocket area of the shirt.
